

SHAW

8KW Solid Fuel Stove

- Available in Non Boiler only
- Power Output Non-Boiler 8KW
- Steel body with cast Iron door
- Top and rear flue outlet
- Riddling grate, Ashpan & Lifter
- Primary & Secondary Air intake including Outside Air ready

Fuel Options Multi Fuel
Colour Options Matt Black only

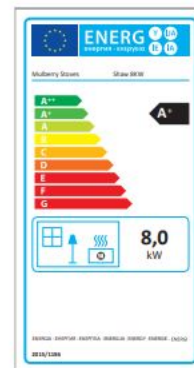

ECODESIGN

At Mulberry we are committed to improving our appliance design so that our stoves are cleaner, more efficient and contribute to improving our environment through lower emissions. A highly efficient solid fuel appliance means that wood and other forms of solid fuels such as charcoal, peat, coal and many more are burned efficiently and economically.

Our stoves are independently tested in accordance with the following standards, EN13240:2001 + EN13240-A2:2004

Our Eco design stove meets the five fundamental requirements of the Regulation (EU) 2015/1185 24/5/2015 for efficiency and emissions.

Essential Characteristics	
Test Fuel	Beech
Fire safety	Pass
Emission of combustion products (related)	Co: 0.09 Vol% No _x : 99 mg/m ³ CxHy: 97 mgC/m ³ Dust: 19 mg/m ³
Surface temperature	Pass
Measured thermal output	8.0kw
Energy efficiency	75.4%
Release of dangerous substances	Pass
